¹ There are various "barrels" established by law or usage. Federal law recognizes a 31- and a 40-gallon barrel, depending on the type of liquor. In addition, the number of gallons recognized as making up a barrel differs among various States.

² Standard for fruits and vegetables and other dry commodities, except cranberries, recognized by the Dept. of Agriculture.

APPROXIMATE WEIGHT OF PETROLEUM AND PRODUCTS

[In the United States petroleum and its products are measured by bulk, not weight. Quantities are customarily reduced to the equivalent of barrels of 42 U.S. gallons (158.984 liters). In many foreign countries these commodities are measured by weight. The specific gravity of the different grades of crude petroleum and of the finished products varies materially. On the basis of approximate averages, the Department of Commerce uses the following factors for converting foreign weight statistics to gallons or to barrels of 42 gallons]

Historical Series—Index to Tables in Which *Historical Statistics* Series Appear

[Listed below are those statistical time series (identified by number) appearing in *Historical Statistics of the United States, Colonial Times to 1867*, and its companion volume, *Historical Statistics . . . Continuation to 1868 and Revisions*, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where comparable data are available for a year or years later than 1867. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

APPENDIX III

Guide to Sources of Statistics

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained therein is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for several years or new types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 996-999) and in reports for particular commodities, industries, or similar segments of our economic and social structure. Because of the large number of such references, they are not included here.

Section references on the right-hand side of each page indicate where data from the report cited appear in the *Statistical Abstract*. Where both current reports and a summary volume are cited, the section reference often appears opposite the summary volume only. Reference to the sections indicated will enable the user to ascertain the type of information presented in the original source. It should not be assumed that all of the subjects from the original source are summarized in the *Abstract*.

Publications listed under each subject are divided into two main groups: "United States Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington. Mailing addresses of non-government agencies and of international organizations are given on pp. 1002-1005.

Major reports, such as the *Census of Population*, which consist of many volumes, are listed by their general, all-inclusive titles. Specific volume numbers and subtitles of the major census publications are listed on pp. 992-995.

Note.—In April 1961, the economic research and statistical reporting functions of the Department of Agriculture were reorganized, affecting the Agricultural Marketing Service, the Agricultural Research Service, and the Foreign Agricultural Service. Some of the work formerly conducted in parts of these three services has been brought together in two agencies, the Economic Research Service and the Statistical Reporting Service. These two agencies now issue many of the current reports shown below as issued by AMS, ARS, and FAS. In February 1965, the name Agricultural Marketing Service was changed to Consumer and Marketing Service.
